

THUNDERSCAN® IS SO IMPROVED YOU WON'T BELIEVE YOUR EYES.

Ever since ThunderScan started zipping back and forth inside the ImageWriter™, it's been famous for eye-popping graphics. And now, the most popular Macintosh™ scanner is better than ever. With exciting new features you won't find on scanners costing ten times as much. True halftone capabilities.

Now you have a choice of true halftones or dithered bitmaps.

New file formats. Special effects. And more.

ThunderScan halftones are really something to behold.

Because ThunderScan returns true gray shade information to the Macintosh. Not just dithered

ThunderScan is compatible with desktop publishing software.

bitmaps like most scanners. So even the most subtle details are captured. And with ThunderScan's sophisticated software palette, you can alter any image to your art's desire.

ThunderScan images can now be saved in a variety of formats, including PostScript® (EPSF), MacDraw™ (PICT)

and TIFF. That means complete compatibility with PageMaker® 2.0 and other advanced desktop publishing programs. So you can grace the pages of your publications with honest-to-goodness halftones generated by LaserWriter™. Like the images you see in this ad. And wait 'til you see the output from higher resolution printers like

Frame your images in a variety of shapes.

the Linotronic® 100. Incredible!

Especially effective are ThunderScan's special effects. Straight line screens. Rotations. And frames. Plus, we've added a lasso that lets you control the shading of irregular shapes.

We've even made a major hardware improvement. It's called Power Port™. Just plug it in and ThunderScan is Macintosh Plus and SE compatible. With no additional accessories. And, Power Port can power most serial port peripherals.

Yes, the new improved ThunderScan is sure to raise some eyebrows. And its price is definitely a sight for sore...well, you get the picture.
